Differentiators

- We have a truly outstanding team of highly experienced industry leaders and staff with over 65 years of combined consulting experience
- By following an agile methodology, we drive benefits quickly and consistently
- Our approach is designed to empower your team and equip them with the tools they need to succeed

About Us

Nexus Cognitive Government Solutions, LLC knows effective data management is the lifeblood of any business, and that requires more effort than collecting and storing it. Data must be treated as a tangible asset. It is the differentiator that produces a competitive advantage.

Nexus develops creative, pragmatic, agile, cost-effective solutions to help our clients use analytics to convert their data into just such a competitive edge. Whether you are looking to modernize, drive innovation, integrate your operations, excel in your day-to-day performance, or gain insights into your operations, assets and services, we can help.

Industry Experience

- Energy - specifically Oil & Gas (Upstream, Midstream and Downstream), as well as Utilities
- Public Sector - specifically Department of Defense; Aerospace & Defense
- Travel & Transportation
- Healthcare
- Media & Entertainment

Past Performance Notables

- Asset Workflow Software Solution for Major Oilfield Services Company that the COO said "...maximized well productivity for our global client base, thus driving revenue and profitability." Roadmapped the plan forward, then executed the acquisition, correlation, management and visualization of both structured and unstructured data sources.
- IT Process Optimization for Major Healthcare Services Company, improving IT's ability to serve the company, improving efficiencies, driving down costs and improving morale and retention. Implemented SDLC methodology as well as automated annual review processes.
- DevOps Framework Design and Deployment for Big 4 Professional Services Firm, fully automating provisioning, configuration, security approvals and deployment, greatly reducing cycle times, driving costs down by 33%, driving out duplication across programs, and promoting reuse with high buy-in rates by development teams.
